Teaching Experience

Graduate Teaching Assistant – OMSCS CS 6200 (GIOS), Georgia Institute of Technology Aug 2026 – present

- Serving as a GTA for a graduate operating systems course; experience supporting students in an online MS program.

Workshop Instructor – DevOps, Vidhyavardhaka College of Engineering, India Sept 2023

- Led a DevOps-focused workshop for faculty, explaining software engineering practices and technical concepts to an educator audience.

Education

Georgia Institute of Technology, MS in Computer Science – Computing Systems Expected May 2028

- Relevant Fall 2026 coursework: CS 6400 (Grad Intro to Database Systems) and CS 6222 (Systems for ML).

The National Institute of Engineering, BE in Computer Science and Engineering Jun 2023

Professional Experience

Software Engineer II, JPMorgan Chase & Co. Jan 2025 – July 2026

- Designed and delivered a distributed PySpark/Java data-processing platform, leading architecture, implementation, and production rollout.
- Built and launched a distributed PySpark/Java processing platform; removed Databricks-DynamoDB state synchronization, improving throughput by up to 80%.
- Optimized Spark execution (up to 10M records) to reduce runtime by 85%; improved Databricks data skipping from 65% to 98% and cut cluster compute costs by ∼40%.

Software Engineer I, JPMorgan Chase & Co. July 2023 – Dec 2024

- Built Airflow-orchestrated pipelines using Kubernetes (EKS) and NiFi; reduced Polars/AWS Lambda peak memory usage by 60% through lazy evaluation.

Projects

XDBC: Cross-DBMS Data Transfer | Go, PostgreSQL Fall 2026

- Co-developing a Go client/server data-transfer system with wire protocol, serialization, buffer management, and PostgreSQL integration; reproducing transfer benchmarks against PostgreSQL FDW baselines.

Publications

COUNSEL - Cloud Resource Configuration Management using Deep RL May 2023

Proposed a Deep RL framework for cloud resource configuration using queueing-based service-chain modeling.
Adithya Hegde, Sameer G. Kulkarni, Abhinandan S. Prasad
10.1109/ccgrid57682.2023.00035 (**CCGRID 2023**)

Skills

Programming: Python, SQL, Java, Go; working familiarity with C++ and Rust

Databases & Data Systems: PostgreSQL, Apache Spark, Databricks, Delta Lake, Airflow, Polars

Systems: Kubernetes, AWS, Linux
